

Maul Technology

A Division of VHC Ltd.

Heavy Duty Blowhead Mechanisms

Features:

- Heavy duty cam with increased size of cam roll and stud
- Chrome piston rod
- New style cylinder head
- Cartridge style check valves
- Adjustable end of stroke cushion for the 'up' and 'down' stroke located on cylinder head for accessibility

Benefits

- Smoother operation and greater accuracy of movement
- Longer mechanism life
- Reduced chatter and misalignment

Heavy Duty Blowhead

Mechanisms available from Maul Technology for use on a range of I. S. Machines. The Heavy Duty Blowhead Mechanisms are available in standard or short stroke and are fitted with solid piston rods for use with external final blow. Each mechanism contains new components together with existing sub assemblies which have proven themselves in extensive field trials.
